EVERGREEN GRAFTS

SPRING 1938 DELIVERY

CHANDLER LANDSCAPE & FLORAL CO.
101 W 47th STREET KANSAS CITY, MO.

WHY OUR GRAFTS ARE THE BEST THAT CAN BE GROWN

FIRST

They are made by expert labor only.

SECOND

Made on family stock.

THIRD

Made on strong thrifty understock with proper root growth established in 2 $\frac{1}{2}$ inch pots.

FOURTH

Made with long young scions. NOTICE OUR SIZES.

FIFTH

Proper heat and ventilation to insure proper callousing.

These are only a few of the reasons why Chandler's Grafts make such rapid growth when lined out in the field.

DIRECTIONS FOR PLANTING

Plant directly in the field after freezing weather is over. Have soil well prepared. Plant only deep enough to cover the graft union.

CULTIVATION

Be sure to keep a dust mulch in dry weather, never allowing the ground to become hard and baked.

TIME OF SHIPMENT

These Grafts are ready in March but we would advise waiting until freezing weather is over before making shipment.

PRICES

Our prices are reasonable. Thirty of the same variety are priced at the 100 rate, 300 at the 1000 rate.

We allow 3% discount and boxing free when cash accompanies the order.

1. The first part of the paper is devoted to a general discussion of the problem.

2. In the second part, we consider the case of a single particle.

3. The third part is devoted to the case of a system of particles.

4. In the fourth part, we consider the case of a system of particles with interactions.

5. The fifth part is devoted to the case of a system of particles with interactions and a magnetic field.

6. In the sixth part, we consider the case of a system of particles with interactions and a magnetic field.

7. The seventh part is devoted to the case of a system of particles with interactions and a magnetic field.

8. In the eighth part, we consider the case of a system of particles with interactions and a magnetic field.

9. The ninth part is devoted to the case of a system of particles with interactions and a magnetic field.
